# SAKE SERVING SUGGESTIONS

## POURING ETIQUETTE

Japanese culture places importance on respecting each other during all customs, including sake consumption.

- Pour sake with both hands by holding the neck of the bottle or carafe as much as possible.
- Pour each other's cups when sharing sake.

## DRINKING VESSELS

- Serve sake in a wine glass for the ultimate sensory experience.
- More traditional vessels include wooden box cups (masu), porcelain cups (ochoko), and carafes (tokkuri).

# TOP 6 MISCONCEPTIONS ABOUT SAKE

### Myth #1 Sake should be drunk hot.

There is a great range of enjoyable temperatures to drink sake, but serving it steaming hot masks its subtlety and exacerbates the alcohol.

### Myth #2 Sake is low in acid relative to wine.

Sake lacks the acids associated with wine (tartaric and malic), but it is higher in amino acids than wine is. This makes it a perfect pairing for food.

### Myth #3 Sake is high in alcohol.

Sake yeast is only capable of fermenting a beverage until it reaches 20% alcohol, and the sake is usually diluted afterward to bring down the level of alcohol to 14 to 18%.

### Myth #4 Sake should be cheap.

Large format bottles of table sake are inexpensive, but the same is not true for premium sake. The high quality raw materials and the careful precision that goes along with crafting the beverage is very expensive.

### Myth #5 Sake causes hangovers.

Excessive drinking of any alcohol will eventually cause a hangover. However, premium sake has no sulfites, additives, or preservatives, which is what many people believe to cause hangovers.

### Myth #6 Sake oxidizes in the same amount of time as wine does.

Once opened, premium sake will remain fresh for at least one week. Some sakes stay fresh for even longer!

# HOW TO SPEAK SAKE (Sah-kay) 酒

**Genshu 原酒 (G'en-shoe):** Undiluted sake that is often higher in alcohol and more concentrated in flavor and texture.

**Ginjo 吟醸 (Geen-joe):** Premium sake. Indicates a special and painstaking brewing process that produces a sake that is layered and complex, light and fragrant. Must have a seimaibuai (milling rate) of at least 60%.

**Jizake 地酒 (jee-zah-kay):** Local sake made by small brewers from a particular region, similar to the beer term "micro-brew."

**Kanpai 乾杯 (kahn-pie):** Cheers!

**Kimoto 生もと (key-mo-toh):** Traditional type of yeast starter with no lactic acid added. The yeast is activated by mashing the rice and koji into a paste with long poles. It takes around a month, resulting in savory, often gamey flavors.

**Koku 石 (koe-koo):** Originally, a measurement of rice defined as enough to feed one person for a year. For sake, a measurement of 180 liters used for describing a brewery's production capacity.

**Koji 麹 (koh-jee):** Mold that prompts the sake fermentation process.

**Koshu 古酒 (koh-shoo):** Sake deliberately aged in either bottle or tank. It must be kept at low temperatures in order retain a clear color and have a subtle roundedness and richness in texture.

**Kura 蔵 (koo-rah):** Sake brewery

**Moto 酒母 (mo-toh):** Yeast starter, also known as "shubo." An extremely high concentration of yeast cells is cultivated in a mixture of rice, koji, yeast, and water.

**Nomikai 飲み会 (noh-mee-kai):** A get-together or event focused around drinking.

**Sakenomi 酒飲み (sah-kay-noh-mee):** Someone who likes to drink.

**Seimaibuai 精米歩合 (say-my-boo-eye):** The degree to which rice has been polished (milled) before brewing. A value of 60% means that the rice has been milled so only 60% of the rice kernel remains (40% of the kernel has been ground away).

**Shinaku 心白 (sheen-pah-koo):** The hard, white center of sake rice comprised of starch.

**-Shu 酒 (shoo):** Another reading of the Japanese character meaning sake (which, in Japan, refers to any alcoholic beverage). This suffix is officially part of all sake types (e.g. junmai-shu, ginjo-shu) but is often dropped in abbreviation.

**Toji 杜氏 (toe-gee):** Head brewer of a brewery.

**Tokubetsu 特別 (toe-koo-bet-sue):** Special. Any sake labeled "tokubetsu" has been brewed in some special way. This may mean a high milling rate, a very low temperature fermentation, or a very special rice strain.

**Yamahai 山廃 (yah-mah-hai):** Yeast starter with no lactic acid added; yet instead of mashing the rice and koji together (kimoto), the koji enzymes work to dissolve all rice so that sake yeast can activate. Similar flavor profile to Kimoto.

**Yopparai 酔っ払い (yoh-pahr-eye):** To be drunk.

# AMA NO TO

The epitome of the “local” farm-to-table movement, Ama No To only uses rice, water, and labor from its own prefecture

## WHY DOES AMA NO TO STAND OUT?

- This is a true “Grower’s Sake” - the rice growers also make the sake, creating an intimate synergy with the raw materials. They only use rice from fields close enough to see from the brewery.
- Ama No To translates to “Heaven’s Door,” referring to the prefecture which is at the northernmost tip of Japan. The label image is an icon of good fortune from Amaterasu, the Shinto Sun Goddess who is believed to have brought light to the world and cultivated Japan’s first rice fields.
- Toji Moriya-san is a critically acclaimed chef who brews his sake specifically to improve a meal.

**BREWERY LOCATION:** Akita Prefecture

— SAKE —

**HEAVEN’S DOOR** (Tokubetsu Junmai): This incredibly well-balanced and complex sake takes its time to express itself in the glass. Layers of dried flowers and baking spice give way to savory salinity that make this sake the perfect pairing for pickled and fermented foods.

*\*Heaven’s Door Namazake also available seasonally.*

# BUSHIDO

Premium, handcrafted Ginjo Genshu Japanese sake fit for the warrior in you.

## WHY DOES BUSHIDO TO STAND OUT?

- “Bushido” is the name for the ancient Japanese samurai code of moral values, loyalty, honor and wisdom. The fox represents the messenger of Inari, the God of rice, from Japanese mythology.
- Brewed in Kyoto, Japan, a prefecture known as the birthplace of sake. The brewery specializes in sake that is approachable for sake pros and novices alike.
- 180ml resealable can perfect for fitting into the active lifestyle or your pocket.
- The 1<sup>st</sup> Japanese sake available on tap.

**BREWERY LOCATION:** Kyoto Prefecture

— SAKE —

**BUSHIDO WAY OF THE WARRIOR** (Ginjo Genshu): This undiluted sake is 18% alcohol and can stand up to a variety of foods or be used in cocktails. Tropical notes of tart raspberry, Asian pear, and watermelon rind with a hint of white flowers and a spicy finish. Excellent paired with shrimp, BBQ or on its own.

 **BUSHIDOSAKE**

## VC MAKES IT EASY TO USE SAKE ON TAP

SAKE KEG

### BEST PRACTICES

**GAS** 75% Nitrogen / 25% CO2 (AKA Beverage Gas or “Guinness Gas”)

**GAS PRESSURE** Pressure gauge reading should be between 4 - 10 PSI

**STORAGE** Store untapped kegs with other wines. Sake stays fresh - tapped 3 months, untapped 12 months.

**LINE CLEANING FREQUENCY** Every 3 months, or at changes of product.

### EQUIPMENT & HARDWARE [ Only use wine-certified 304-grade Stainless Steel No 303-grade Steel or beer parts ]

#### FAUCET

For the best tasting sake on tap, we recommend a 304-grade stainless steel flow control faucet.

#### SHANK

Use 304-grade stainless steel for any parts that come in contact with the sake.

#### BEVERAGE GRADE LINES

Use only wine-grade, non-oxidizing “flavorlock” tubing.

#### COUPLER

Free Flow standard stainless steel kegs require a 304-grade coupler to attach the keg to the line.

### ADDITIONAL EQUIPMENT

#### TAP TOWER

An additional tap tower may be required when installing a new direct draw system.

#### GAS & REGULATOR

Use Beverage CO2 gas only. In some instances, an inline gas regulator may be recommended.

# CHIYONOSONO

Known as the Junmai expert, Chiyonosono was the first brewery to stop adding distilled alcohol to its sake after the rice shortages of World War II, paving the way for the popular Junmai category.

## WHY DOES CHIYONOSONO STAND OUT?

- Originally a rice wholesaler, Chiyonosono specializes in rice cultivation and has access to heirloom strains leading to sake with distinctive rice textures and aromas.
- The brewery is located on the southernmost island of Kyushu - the gateway into Japan - known for Asian and European cuisine, historic architecture, and distinct regional culture.
- Chiyonosono also crafts shochu, Japan's other native alcohol beverage made from distilling raw materials like rice, barley, or potatoes. It can be served neat, or on the rocks, or with mixers

**BREWERY LOCATION:** Kumamoto Prefecture

SAKE

**Shared Promise (Junmai):** A commitment from the brewery to make premium sake despite agricultural hardships like those of WWII. Soft, expansive texture with aromas of orange blossom.

**Sacred Power (Junmai Ginjo):** A sake made with the heirloom rice Kumamoto Shinriki which was out of use for 50-100 years. The revitalized rice creates a bold sake loaded with briny ocean flavor and umami.

**8,000 Generations (Shochu):** A crisp rice shochu with hints of honeydew and a medium body. Its rice origins make it a true sake-lovers shochu, and it is a great cocktail mixer.

# FUKUCHO

Fukucho's female brewery owner, Miho Imada, is also the Toji - a rarity in Japan to have both jobs done by the same person.

## WHY DOES FUKUCHO STAND OUT?

- Hiroshima is the birthplace of Ginjo sake and is known for remarkably soft water that requires expert skill to use in sake production. Once mastered, the soft water enables a highly controlled, precise fermentation, resulting in vibrant fruit aromas.
- Miho-san's passion and curiosity for sake brewing is truly amazing: to date she has revived a local heirloom rice that was out of use for hundreds of years, created her own hybrid yeast starter, and experimented with brewing sake using white koji.
- There are around 30 female tojis in Japan, but when Miho-san started brewing there were far fewer. Her extreme dedication to her craft encourages the future of women in this industry.

## BREWERY LOCATION: Hiroshima Prefecture

### SAKE

**FORGOTTEN FORTUNE** (Junmai): Miho-san revived Hattanso rice, an extinct heirloom breed, by devoting over 10 years of her life to learning how to grow it and brew with it. She mills the rice less than most Junmai sake because she believes it results in the best expression of its flavor, balance, and complexity. Hiroshima has more oyster beds than anywhere else in Japan, influencing the amazing pairing offered with oysters.

**MOON ON THE WATER** (Junmai Ginjo): This vibrant showstopper aromatically jumps out of the glass and will make you fall in love with sake. It is a natural match for sweet, succulent shellfish like lobster and scallops, but surprising pairings like bittersweet chocolate work, too. *\*Namazake also available seasonally.*

**SEASIDE SPARKLING** (Junmai): Sparkling sake made through secondary fermentation in bottle. Crisp notes of lemon-lime and apple aromas with a soft, frothy finish that pairs well with seafood.

# GINGA SHIZUKU

Premium drip-pressed sake that celebrates nature's local gift of Dewasansan rice & water from Yamagata prefecture.

## WHY DOES GINGA SHIZUKU STAND OUT?
