LARGE FORMAT SAKE OFFERINGS

1.8L sake bottles, *or "Isshobin",* have an undeniably impressive appearance while also providing many benefits. Each bottle contains (15) 4oz pours and are a popular size for restaurants and retailers that focus on parties and gatherings for a lot of people.

- **Better Cost Savings:** Improve BTG profitability by up to $1.00 per 4oz glass (wholesale pricing). Unlike magnums of wine, large format sake offer a better cost/ounce savings when trading up from a 720ml bottle.
- **Consistent Pours**: 1.8L maintain quality and taste from the first pour to the last, providing a smooth and consistent proper drinking experience.
- **Temperature Resistance:** The larger volume of liquid takes longer to warm or cool, making it resistant to environmental temperature changes.
- **Dramatic Presentation:** Whether given as a gift, or standing as the centerpiece of special occasion, 1.8L create a dramatic presentation and give a sense of luxury.
- **Age Gracefully:** Large format bottles are designed to age gracefully. The closure surface-ratio allows the sake to age more slowly and produce more robust flavors.
